

*Future Classroom Lab – Regional Network
1st Breakfast expert talks & Strategic Seminar
10 May 2016*

“Beyond the text book”

Venue: Common Representation of the European Region Tyrol – South Tyrol – Trentino, rue de Pascale 45-47, B-1040 Brussels

The **Future Classroom Lab Regio** project is providing new opportunities for regional educational authorities to explore common challenges related to the **integration of ICT in schools**. It includes three regions in Europe (Catalonia, Gothenburg Association of Local Authorities, Autonomous Province of Trento), that are at the forefront of making innovative use of ICT, and is looking to involve other regions in its network.

During the 1st breakfast expert talks and the Strategic Seminar, project partners, regional representatives as well as decision makers in national ministries, will come together to discuss how regions are responding to developing, accessing and using digital educational resources.

This has always been a challenge for policy makers but has become increasingly critical in the last few years given: the explosion of mobile apps; new interoperability standards and specifications; the growing demand for more personalised pedagogical approaches; and the increasing numbers of schools that wish to implement a 1:1 computing strategy or Bring Your Own Device initiative.

Most importantly, the meeting will provide an early opportunity for the participants to **contribute to the shaping of a pan-European network of Regional authorities** active in the education sector, which represents the ultimate aim of the project itself.
