

DIS-CODE Open day

Coding Jam for teachers and students

WHEN: 18 October 2018, from 2:30pm to 5pm

WHERE: Future Classroom Lab, Rue de Trèves 61, third floor, 1040 Brussels

The [DIS-CODE project](#) is happy to celebrate **EU Code Week** giving the chance to teachers and their students to experiment with coding and work in group activities that do not require any previous experience in programming.

For this reason, a special event will take place at the [Future Classroom Lab](#), in Brussels, and every teacher is welcome to register and participate on their own or with their students. During the workshop, the main results of the DIS-CODE project will be presented and participants will get **hands-on** experience, solving challenges about **robotics, visual programming** and mobile **app development**.

The activities will be in English but assistance in French can be provided, whereas they are addressed equally to educators and their students giving them the chance to learn by playing and creating together.

It is **mandatory** to register your participation before coming as places are limited. Registrations are on a first-come, first-served basis so **we encourage you to register as soon as possible**.

Fill in [the registration form](#), we will confirm as soon as possible your place to this **free** event.
