

Future Classroom Lab – Regional Network 2nd Breakfast Expert talks – 11 May 2017

*“Mobile learning and cloud computing for education
– training the teachers of tomorrow”*

**@ Future Classroom Lab, European Schoolnet, Rue de Trèves 61,
B-1040 Brussels, third floor**

Educational technology, online resources, mobile learning and cloud services, can greatly enhance students learning. For this to happen, we need to advocate for, and promote, an effective and pedagogical oriented use of technology in the classroom. Furthermore, we need to secure that innovative teaching and learning reaches out to all students, and it is not limited to some lighthouse institutes.

A paramount element for mainstreaming innovative teaching and learning is training and engaging all the teachers in the transformation process. How are Regions providing educators with the skills and competences they need to effectively use educational technology in the classroom? What can teacher-training providers do to empower educators to make the best of the digital transformation in the education sector?

The 2nd Breakfast Expert talk will be an opportunity for regional and local educational authorities to share their policies and initiatives as well as discuss clear answers to these and other core questions.
